They indicated that the road is heavily used and is a route used to get in to the town elevators. It was then explained to them that the municipality did not continue to maintain roads where there were no people living and where the road was no longer needed. The farmers in the Sewell area have access directly to P.T.H. 23 two miles east of Morris and can use that road to get in to the elevators in Morris. There was some discussion as to the deteriorated condition of the roads if they are not gravelled and maintained for a few years. Following some further disucssion on the matter, the delegation was ended.
Council felt that there is an adequate access route into the Town of Morris and it was not that roads be maintained to provide access in to a particular elevator or part of town but merely to the town in general.
